

Stars & Stripes Cool Connections Lego Camp Camp Spotlight

June 18-22, 2012	1:00-4:30pm
June 25-29, 2012	8:30-12:00pm
July 23-27, 2012	1:00-4:30pm
Aug. 13-17, 2012	1:00-4:30pm
Aug. 27-31, 2012	1:00-4:30pm

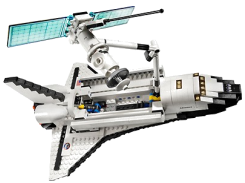

Day \$29 Week \$119

Is your child a young engineer? Do they enjoy spending hours building with different types of blocks and connection pieces? If so, then sign them up today for Cool Connections Camp. Campers will use their creative imagination and build skyscrapers, vehicles, and other gadgets, using different building and connection supplies. Each day campers will be challenged with new industrial design opportunities. They will also get the opportunity to present their creations with the entire camp. What a fun way to use your imagination and creativity! Bring a bathing suit and towel for water activities on Friday.

Monday: Architecture Campers get to let their imaginations run wild as they decide what type of building or structure they want to design and build. A skyscraper, their dream house, a statue, a log cabin; the possibilities are endless. They will spend some time designing and drawing a plan and then they will construct it using various types of building blocks and connection pieces.

Tuesday: Automotive Engineering Vehicles are a big part of our everyday lives. The auto industry is huge, and many of us even know someone who works in it. Today campers will get to step into the shoes of an automotive engineer and design, draw and build any type of vehicle they would like. They could build a car, a bus, a semi truck or even a flying car. They will get to be engineers with endless possibilities.

Wednesday: Aerospace Engineering Have you ever been on a plane? Where did you go? These are some questions we will explore with our campers as we learn about a very exciting type of engineering: aerospace. Aircrafts and spacecrafts are truly fascinating and campers get to design and build one. They could build their own private jet or a rocket than can travel to another universe. We will let the aerospace engineers decide.

Thursday: Robotics Robots are becoming a big part of our lives. So many of the jobs that used to be done by people are now done by robots. Robots sure can make some of our lives a little easier. Today campers will design and build a robot that can do something a normal person may not be able to do. They can give their robots humanlike characteristics and have it be their personal assistant. Robotics is a lot of fun and there is so much you can do with it.

Friday: Boats Boats come in so many different shapes and sizes. They are also used for a variety of things. Campers will become boat specialists today and decide what kind of boat they would like to create. Do they want a boat to cruise around the lake with to go tubing? How about a pirate ship? They can even create a cargo ship or a cruise line. Whatever they decide, designing and building boats is sure to be a rockin' good time.
